CONCLUSION	FAIL				

Special Attention:

1. No approval sample or product specification was available for inspection reference.
2. When inspector arrived in factory, there were 3300 pieces were packed into cartons. Factory provided the quantity was 22,100 pieces , there were 3300 pieces were finished and packed into cartons, about 11,400 pieces were semi-finished products(did not fixed button and sew the label), others have not produced.
 Client only provided the total quantity information (20,000pieces)

3. No packing method was provided, products weight, master carton size and gross weight. Please see following table.

4. Actual found no shipping mark and side mark on master carton.

5. Actual found that the number of sewing frames is too dense, resulting in wrinkles on the edge of the products

6. This was the fixed sample size inspection(300 pieces) and half production inspection by client requirement, no applicant inspection standard was for reference, the workmanship check result was pending and subject to client decision.

Checklist
1. How is the overall quality?- The quality was good, some defective were found, refer to special attention.
2. Try it in real time and how is the touch feel?- Feel good.
3. Are the features okay? How are the threads?- Actual found that the number of sewing frames is too dense, resulting in wrinkles on the edge of the products
4. Did they followed our requirements properly? Check our separate pdf for quality check points. -Yes.
5. Check for size if is okay or not. -Yes
6. Just overall good quality is very important for us. - Good
7. All the items are accurate and if there is any bad quality item change or replace it. -Yes, factory replaced defective on site.
8. Overall packaging and quantity is okay?- Good.

[X] Combine items sampling inspection

"Per the Client's request, PinJi has performed this inspection by using the combine items sampling method. The Client understands that under this inspection method the statistical techniques that would otherwise be the most appropriate for this particular inspection as under the applicable single item sampling method will be substantially compromised, hence the chance of failing to identify quality and other problems in the inspected goods is greater than that when using the single item sampling method. In view of that, the Client and PinJi hereby expressly agree that PinJi shall be exempted from all and any liability caused by or arising from using the combine items sampling method including liabilities to any party for any decision or reliance concerning the acceptance, payment authorization or shipment of the inspected goods and the Client will hold PinJi harmless against any loss and damages as a result of so doing."

The above reflects our findings at time and place of inspection. This report does not relieve

sellers/suppliers from their contractual obligations regarding quantity and/or quality of this delivery.

This report is issued without prejudice to liability and the information contained herein is to the best of our knowledge and belief, true and correct. This document shall not be reproduced either in full or in part except with written approved by the Authorized Representative of PinJi.
